	Aaron Roane	3739
The MAILING DATE of this communication		
Period for Reply		,
A SHORTENED STATUTORY PERIOD FOR RETHE MAILING DATE OF THIS COMMUNICATION  - Extensions of time may be available under the provisions of 37 CF after SIX (6) MONTHS from the mailing date of this communication. If the period for reply specified above is less than thirty (30) days, If NO period for reply is specified above, the maximum statutory period for reply within the set or extended period for reply will, by some Any reply received by the Office later than three months after the rearned patent term adjustment. See 37 CFR 1.704(b).	ON. R 1.136(a). In no event, however, may a n. a reply within the statutory minimum of thieriod will apply and will expire SIX (6) MOI statute, cause the application to become A	reply be timely filed  ty (30) days will be considered timely.  NTHS from the mailing date of this communication.  BANDONED (35 U.S.C. § 133).
Status		
1) Responsive to communication(s) filed on	09 April 2004.	
	This action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.		
Disposition of Claims		
4) ☐ Claim(s) 1-10 is/are pending in the applica 4a) Of the above claim(s) is/are with 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 1-10 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction as	ndrawn from consideration.	
Application Papers		
9) The specification is objected to by the Exar	miner.	
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).		
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.		
Priority under 35 U.S.C. § 119		
12) Acknowledgment is made of a claim for for a) All b) Some * c) None of:  1. Certified copies of the priority docunt 2. Certified copies of the priority docunt 3. Copies of the certified copies of the application from the International But * See the attached detailed Office action for a second content of the second content of	nents have been received. nents have been received in A priority documents have beer ureau (PCT Rule 17.2(a)).	Application No  received in this National Stage

Application/Control Number: 10/821,338

Art Unit: 3739

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitahara et al. (USPN 5,261,241) in view of Maro et al. (USPN 5,491,018) and in further view of Helmeg (USPN 6,648,909 B2).

Regarding claims 1 and 3-7, Kitahara et al. disclose a topically applied thermal device (13) comprising a flexible plastic containment (10, 12 and 14) and activatable thermochemical liquid composition (C not shown in figure 2) encased therein, said flexible plastic containment comprising a multilayer film (10, 12 and 14) comprising: an outer polymeric barrier layer (12) comprising a coating (10), and an inner polymeric sealant layer (14). Kitahara et al. further disclose that the outer polymeric layer is comprised a layer of polyester (12) coated with a layer of aluminum (12) in order to provide the device with a liquid impervious, leak proof layer see col. 5, lines 29-61, col.

Art Unit: 3739

10 and figure 2. Kitahara et al. fail to disclose that the coating is either aluminum oxide or silicon oxide coating. Kitahara et al. also fail to disclose that the inner polymeric sealant layer comprises a blend of low density polyethylene (LDPE) and ethylvinyl acetate (EVA). Maro et al. disclose a laminated packing material and teach the coating of polyester with a silicon oxide layer in order to provide the device with a liquid impervious, leak proof layer, see col. 1-12. Helmeg discloses a hot/cold pack and teaches the use of making a inner layer, seal and/or bag from LDPE in order to provide a burstable/rupturable barrier to the device, see col. 1-6 and figures 1-9. Therefore at the time of the invention it would have been obvious to one of ordinary skill in the art to modify the invention of Kitahara et al., as taught by Maro et al., to coat the polyester layer with a silicon oxide layer in order to provide the device with a liquid impervious, leak proof layer, and as further taught by Helmeg, to make the inner layer, seal and/or bag from LDPE in order to provide a burstable/rupturable barrier to the device. Finally, at the time of the invention, it would have been an obvious matter of design choice to one of ordinary skill in the art to use an inner polymeric sealant layer comprised of low density polyethylene (LDPE) because Applicant has not disclosed that an inner polymeric sealant layer comprising a blend of low density polyethylene (LDPE) and ethylvinyl acetate (EVA) provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with only the LDPE because it also provides the burstable/rupturable capabilities.

Art Unit: 3739

Regarding claim 2, Kitahara et al. further disclose a device comprising an adhesive layer laminating together said outer polymeric barrier layer and said inner polymeric sealant layer, see col. 6.

Regarding claim 8, Kitahara et al. disclose the claimed invention, see col. 1-16.

Regarding claims 9 and 10, Kitahara et al. disclose the claimed invention, see col. 1-16.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron Roane whose telephone number is (703) 305-7377. The examiner can normally be reached on 9am - 5pm, Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on (703) 308-0994. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
